

New Broferpura 2024 Price List: Innovation and Reliability at the service of our customers

12/04/2024

in force from 1 May 2024

We are thrilled to announce the arrival of the new Broferpura price list catalog, effective from **May 1st, 2024**. This update not only introduces a range of innovative features but also reflects our ongoing commitment to providing cutting-edge products and solutions to meet our customers' needs.

The main additions included in the new price list have been carefully studied and designed to offer significant benefits and enhance the overall experience with our products. Here is a detailed overview of the additions and improvements you can expect to find:

1. **Introduction of Enthalpy units:** Our commitment to energy efficiency and user comfort is reflected in the introduction of

enthalpy units, from RDCD25E to RDCD25SKHCE. Identified by the green letter E and equipped with an enthalpy exchanger, these units offer unprecedented heat recovery and reduced consumption. Now integrated into the price list with specific technical sheets, they represent an advantageous choice for those seeking cutting-edge solutions for ventilation and air treatment.

2. **New NECKGALAXY:** Designed to improve installation and functionality, the new NECKGALAXY offers advanced features compared to the previous PLUGGALAXY. With an additional ABS collar and a protective cover with integrated level, this device sets a new standard of quality in the industry. The price has been updated to ensure unbeatable value for money.
3. **New MOON COLLECTION Grille range:** Our range of grilles is enriched with the MOON collection, made of ABS RAL 9003 with UV treatment. Also available in elegant Silver and Chrome versions, these grilles combine sophisticated design with long-term durability. Consult the full catalog to discover all available options and their respective prices.
4. **Introduction of FLATMOON:** Designed for discreet and reliable integration, FLATMOON is a wall housing frame made of plastic material that ensures perfect installation of our grilles.
5. **New multidirectional distribution UNIVERSE Plenum:** Aimed at improving system efficiency and flexibility, the new UNIVERSE plenum will gradually replace previous models. Made of high-quality plastic material, it offers reliable performance and uniform air distribution.
6. **Optimization of the SANITIZATION Section:** To meet market demands, we have removed less requested antibacterial modules and stations, keeping only the IONIC and ECOFILTRO PLUS models to ensure maximum effectiveness and convenience.
7. **Expansion of the SCHOOL Section:** With the introduction of the VMCS70SH unit, alongside the existing VMCS600 and VMCS1200, we are ready to support school ventilation needs with cutting-edge solutions.
8. **Product updates and removal of some items:** We continue to optimize our offering by eliminating less requested items such as VENERE, GIOVE, AURORA, VANESSA, GINEVRA, and NETTUNO, to focus on the most requested and appreciated solutions by our customers.

To download the new catalog and stay updated on the latest developments, we invite you to visit our download area. Remember that for registered users, the price list will be available directly after login.

Stay tuned for further updates, and thank you for choosing Broferpura as your partner in innovating the ventilation world.
