

# TCO

**Características:** los extractores de techo centrífugos de descarga horizontal de la serie TCO están fabricadas en chapa de hierro pintada con polvo con rotor de acero galvanizado. Representan una solución de máxima funcionalidad y silencio para sistemas de extracción de aire pequeños y medianos. La gran sencillez de instalación favorece su aplicación en todas las situaciones de aspiración de aire sin polvo.

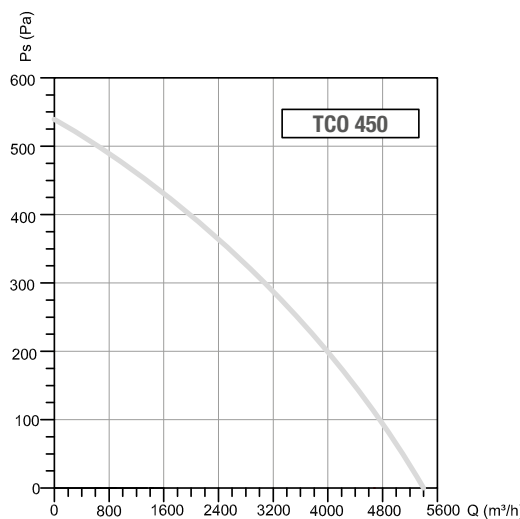

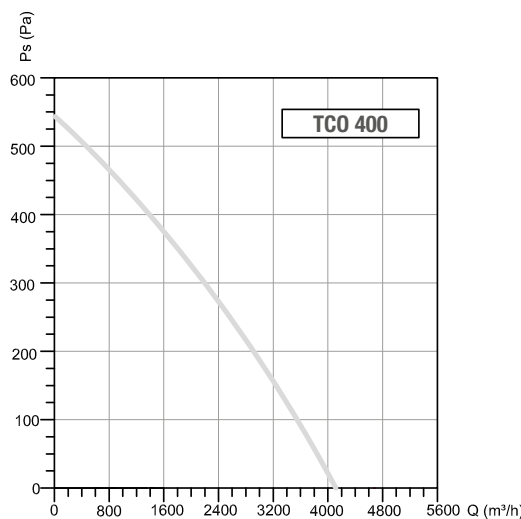

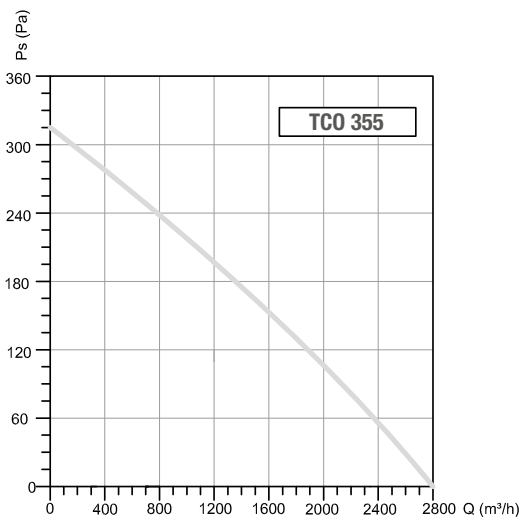

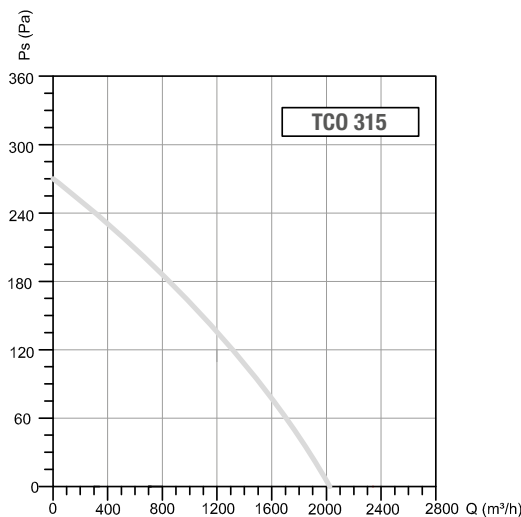

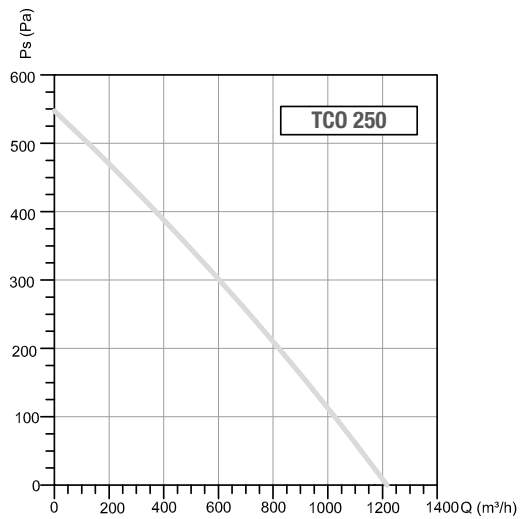

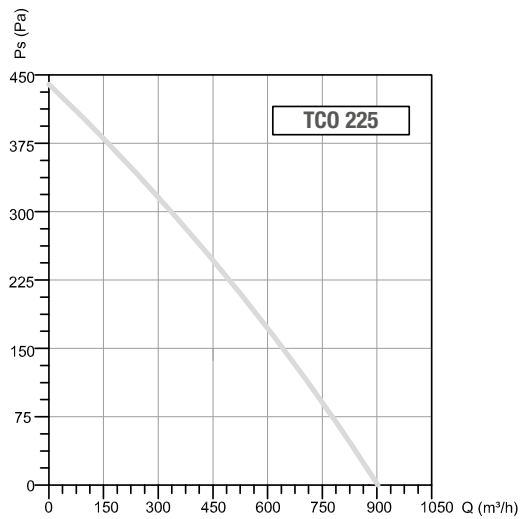

**Characteristics:** the centrifugal roof fans TCO series are made of iron sheet powder-coated with galvanized steel impeller. They represent a solution with maximum functionality low noise level for small and medium air extraction systems. The great simplicity of installation emphasizes their application in all intake air plants with not dusty air.
